THE PURSUIT OF VALUES

By Kalan Narance

As a chapter this past year our goal was to be the first to win back-to-back Peterson's. As a group we understood the lofty task set before us. Over this past year, our chapter has put a lot of time and effort into being the best chapter we could be. We put in extra work, academically meeting our GPA goal and finally surpassing a Sorority in GPA. Philanthropically, we made new connections with Gameday Sports and the Packers, helping us crush our donation goal as we donated over \$6,000 to Huntsman. I am pleased to inform you that on August 5, 2022, the Epsilon Lambda Chapter of the Sigma Chi Fraternity was awarded another Peterson Blue for our efforts. For those of you who don't know, this is our 4th Peterson as well as our 2nd in a row.

A special thank you goes out to our past consul, Eugene Pliska. Eugene has made a great impact on our chapter this past year, leading us to accomplish so many things. Another thank you goes out to our Alumni Association and the Scholarship Community for their continued support, as it does not go unnoticed and is greatly appreciated!

As a house, we have been growing in the right direction for many years now as seen by the increase of standards in GPA, Philanthropy, and all-around brotherhood. This growth will be continued as we strive to attain our 5th Peterson and increase our streak to 3 in a row.

Peterson Award

The Peterson Significant Chapter Award recognizes excellent, but not impossible, performance by chapters in all major areas of operation and programming. For many years, the Peterson plaque has been a symbol of dedication, idealism and achievement.

The Epsilon Lambda Chapter has not looked at this vast achievement with any less respect than it deserves. With this said, we are very proud to announce our second straight year of reaching this high bar and receiving the Blue award. The sole goal, now and forever, is to embody the values of the Sigma Chi Fraternity and the brothers of our chapter will seek to further expand the reach of Friendship, Justice, and Learning.

2nd one not pictured because we have not received it yet

Alumni Golf Outing

The Epsilon Lambda Chapter is very excited to announce the beginning of an Alumni Golf outing coming up this school year!

This event will be during the springtime so there is plenty of time to mark your calendars! More information is coming very soon.

If any Alumni would like to attend or have any sort of involvement, please feel free to contact our Consul Kalan Narance or our Alumni Chair Logan Cooper for more details!

Men's Soccer

Men's Soccer is well under way!

Their season opened with them putting up a fight for a 2-2 result in the annual alumni game!

Several active and former brothers participated for a very enjoyable and rainy evening.

They kick off their conference season in a couple days vs Beloit. The 2022 team includes 15 currently active brothers so be sure to show your support this year!

Pinky Swear

The Pinky Swear Foundation was founded on a pinky swear promise as a dying wish between a 9 year old boy, Mitch Chepokas, and his father. The organization's main goal is to help children with cancer and their families by providing immediate needs, support, and unique family programs. The Pinky Swear Foundation is passionately committed to helping children with cancer and their families with immediate crisis management and aid.

As of right now, the Epsilon Lambda chapter has Sean Roberts, Trent Kazlauskas, and Logan Cooper participating in this organization.

EGOR

EGOR is responsible for many different environmental projects around campus. The organization finds campus areas to plant pollinator gardens, collect recycling and non-recyclable products for use in projects, clean up the prairie twice a year, and further educate students on how they can help reduce the campuses waste and carbon footprint.

Brother Andrew Selfe is the group's current President. He leads meetings and talks to others about their ideas, then is in charge of communicating with the college in order to get the projects rolling. Another piece Brother Selfe has mentioned is his intention to introduce field trips for a more interactive and enjoyable experience.

Order of Omega

Order of Omega is an undergraduate Greek society recognizing "fraternity men and women who have attained a high standard of leadership in inter-fraternity activities." It functions as an adjunct to traditional fraternal organizations, rather than a social or professional group.

We are proud to say that Brother Seid Husic and Sweetheart Christina Seese are two of their active members!

Philanthropy

GameDay Sports:

In July of 2021, Marquette Alumni Marc Morgan proposed a partnership for a philanthropic opportunity through our chapter, started by Brother Adam Wronski, and successfully maintained by the chapter. This includes selling gameday programs at all home Packers games. For each program sold, Gameday Sports donates \$1 to the Huntsman Cancer Foundation on behalf of the Epsilon Lambda chapter.

This opportunity has given us the incredible ability to raise over \$6,000 to the Huntsman Foundation, absolutely smashing through our goal!

Sigma Chi Volleyball

Our current Rush Chair Warren Januskiewicz kicked off the year with one of his many ideas for rush events this semester. The Epsilon Lambda chapter held several volleyball games for independent males that were interested in coming. The turnout was terrific as Brother Warren continues to help the other Brothers establish connections with people they have never met!

Alumni Corner

Dear Brothers of Epsilon Lambda,

After graduating from Ripon College in 2021, I was blessed to have been given the opportunity to work for Your Milwaukee Admirals as a Tickets Sales Executive. I have Sigma Chi to be grateful for this opportunity as Brother John W. Bitter informed me of the position opening. It has always been a dream of mine to work in sports and Sigma Chi gave me the opportunity to know and work with John throughout my four years at Ripon College. Sigma Chi has given me lifelong connections such as Brother Bitter that I will never take for granted. My advice is meet as many Brothers at Sigma Chi events and make as many connections as you can in college because you never know who might have or know of an opportunity for you once you graduate. I also made lifelong friendships that I will always cherish during my time as an active brother. I look forward to watching the Epsilon Lambda Chapter grow and I hope to help out as much as I can in that process.
